

Theta Miracles Last!

Remember the man whose blood pressure skyrocketed every time he thought about going into a doctor's office (March/April issue)? He believed hospitals were places for death....and he was facing surgery for colon cancer! His blood pressure skyrocketed into the stroke danger zone.

Two ThetaHealing™ sessions and a CD to anchor new beliefs was all it took to lower his blood pressure to appropriate levels in every situation. Not only did he approach his surgery with more confidence and appropriate blood pressure, but his surgery was successful "with no further treatment necessary." Change a belief! What a relief!

This drug-free miracle continues! Two months later, he rushed his mother to the emergency room during congestive heart failure. Again, his blood pressure was normal. Approximately four months later, his mother cut herself while gardening. The cut bled profusely. Again, he took her to the hospital and maintained appropriate blood pressure. Before the Theta sessions, he would have fainted at the sight of blood.

This is only one miracle that ThetaHealing™ has supported. By eliminating fears, resentment, rejection, and regret, people transform negative thoughts to positive energy. By changing thoughts, we change our energy. When we exude positive energy, we align ourselves with other positive people and energies. Therefore medical procedures go much more smoothly. Learning is easier. Public speaking is smoother. We are what we believe.

Experience ThetaHealing™ yourself! Learn how replace beliefs that no longer serve you with beliefs that bring health and happiness! www.mindbalance.us has more information.
